

# Mandatory Water Conservation Notice for the Town of Prattsville

Our water storage tank level is currently at critically low levels. To maintain a reliable source of portable water for essential needs, we are asking **ALL RESIDENTS** to immediately take steps to conserve water.

Conservation measures will remain in place until further notice.

Our water system is currently operating as normal and meeting the community's needs. However, if conservation measures are unsuccessful, conservation measures may be enacted. The community's cooperation is vital to ensure that there is enough water for everyone during this challenging time.

## Some ways to help:

- Limit or eliminate lawn and garden watering
- Avoid washing vehicles, driveways, or outdoor areas with water.
- Fix any leaks in faucets, toilets, and pipes.
- Take shorter showers
- Turn off the water while brushing teeth and washing hands
- Run dishwasher and washing machine only when full
- Contact the water department to turn off the water at properties that will be vacant for a long time.

For more information, please contact Jim Dymond at  
607-437-2169.

Please share this information with other people who use the Town of Prattsville water, especially anyone who may not get this notice directly. You can do this by posting this notice in a public place or distributing copies by hand or mail.
